

Veto on Veto

Hilmi Saber – Feb 2024

The talk is about systems, not individuals. Put this in mind while you are through. Please do not be defensive. You have the full right to reject. If you do not agree fully or partially, trash it without hesitation. Thank you.

The concept of idols is very wide in my indices. It could be made of cement, steel, or stones. It could be a human, animal or a concept. It could be a tree. It could be a country. It could be a nation or race. The main common criteria among all these idols is: It is man made.

One of the idols is the one who carries the freedom flame.

It is made of cement. The blocks are lies. The flame is a solid stone.

It will not light the dark , or it shows you the way. Stones in dark.

It doesn't matter the shape of the rock or the shape of the cow or the shape of the flame. All are stones.

The idol neither has eyes, nor to talk or walk. It sees you without sight !. If you hammer it , it will not defend itself. If so, why does he/she use this idol a weight to measure how much I am near or far from liberty !. This is my dilemma that I will talk about.

Let me implement this " cement ism weight " on a scale of Justice. Let us take an example of Israel who - **was/is/will be** - one scale side.

History says:

If the victims are Israelis, the Palestinians are terrorists.

If the victims are Palestinians, the Israelis are innocents.

If Palestinians attack, they are criminals and animals.

If Israelis attack, they have the right to defend.

If **one** Israeli child is killed; the television news will enlarge it, as it is **15,000** kids

If **15,000** Palestinian kids are killed; the television news will reduce it as it is a quarter of a kid !.

If the holocaust in Poland is a crime.

If the holocaust in Occupied Palestine on Palestinians, made by Israelis, is a crime too, but the criminals are the Palestinians; why did not slaughter themselves.

I am wondering why this scale is unbalanced ?!

Let us ask an unbalanced law in university.

One of the answers at university level : The contributors will stop their

donations if the university stands against Israelis regardless of right or wrong.

The Law Department in the same university swallows the blackmail. The law interpreted it in way not to feel guilty; even the chapter of blackmail is torn from the book of law. Still, the Ph. Holders teach justice in that university: Blackmail is a crime !. I think, we need to change the eyeglasses of the scale !.

I told you: Justice is made of cement. Put your cement on your side, or move yourself to be on the idol side. It will be easy to justify ?!.

Why are you surprised !. What do you expect ?. Why are you hesitant ?!.

This is the democracy of the majority. Money makes the small bigger, and makes the less, more. If this is the democracy system !, then how will it be in a dictatorship ?!. I am wondering: is democracy built on money ?!. Those who manipulates the economy, manipulates the democracy too ?! I think, I need to change my eyeglasses too !.

The Law serves who pays in democracy. In dictatorship, the poor innocents will pay !. Justice is based on losing less and gaining more. This is business not politics !

In democracy, your shares must be the biggest. In dictatorship, nothing is left. The dictator takes the whole shares. This is the inclined balanced scale. You did not believe me !. I told you it was made of cement. What do you expect ?!

This is when justice is an idol flame. Millions of people rights are determined
by counting the parliament members' arms.

Raise your arms (in an old-fashioned count)

In automated calculation contemporary fashion:

Push buttons : red or green.

We became cars in front of traffic justice lights. Or in a jungle we drive.

Who agrees?

Who objects ?

Count the arms or pushed buttons

10 against 12

12 against 10

Green is blue

Red is black

Color Blindness

Alternatively, you may name it: Number Blindness

In all counts, and in all colors

Israel is always innocent

Sorry for this language: Let a walking dog urine over this justice!

The way the dog is doing it, is like this inclined scale.

Forgive me for putting it in an artistic frame.

All nations in United Nations

Long Time Consumed

After all that, the representative raises his red veto saying:

I object. The decision will not pass.

The decision is dead; it will not be implemented even if it is passed.

It is the justice of veto idols. What a funny justice ?!

It is not you , the one we should blame. We blame them , those who thought:

Between your fingers, justice springs.

Your statue of liberty makes you free. I doubt it !.

On the other side, your liberty wants us to be your slaves ?!

It is so sad;

You sacrifice kids who were killed with their moms and dads

in order to be elected by the donors next time ?!

How cheap you are with your idol's flame in your cheap chair !.

Look at yourself in a mirror and write:

Do not seek justice, when the counted arms by the Israelis are twisted

I will give another law case. Before that, let me fix my eyeglasses.

I will remove one glass and keep the other.

I see only with one glass. What I am going to do:

I will take those who are criminals in my definition to another location

I suggest Cuba in order not to implement my law on them. I will invent new laws for them with new criminal titles to prevent the implementation of the International Law !.

Let us read this event after I fix the missing glass:

How do I want to implement the justice of law, while I myself intentionally with full awareness intended not provide them the proper justice which could consider them innocents in my location. **Put in mind: humiliation and torture are not allowed and accepted in my location.**

I wanted to convince myself of the Liberty Idol Justice. I could not ?!

It is the justice of stones and cements.

If you exceed the speed limit - sorry - I wanted to say: if you exceed the talk limits in Democracy, you will be humiliated, and tortured in jail due to national security reasons.

In Dictatorship for the same due, you will be shredded.

The action is the same under different names.

Are they not the same ?!.

It would be much better : not to put eyeglasses; seeing in different eyes get you in trouble !?.

Step forward or backward one step; to fix the scale.

I am not asking you to jump, or to hold the scale from its edge.

Only, one step.

Lighten the flame

Take care
